

**PESUKARHU**®

**Fighting for reduction,  
removal and elimination  
of microplastics in sensitive  
key areas of human living.**

| Since 2020 |

★★★★★

“It cleaned my pots  
(including the ones  
made of teflon) better  
than anything and  
without a scratch. I  
was super surprised  
how well and fast it  
cleaned my induction  
glass stove surface.”

## MISSION

**Provide environmentally impactful and responsible solution to reduce/replace/elimination microplastics, plastics, foams, and more..., holistically.**

**PESUKARHU<sup>®</sup>**

REPLACE ALL THESE

Biodegradable  
5x better performance  
NO SCRATCHES

PESUKARHU®

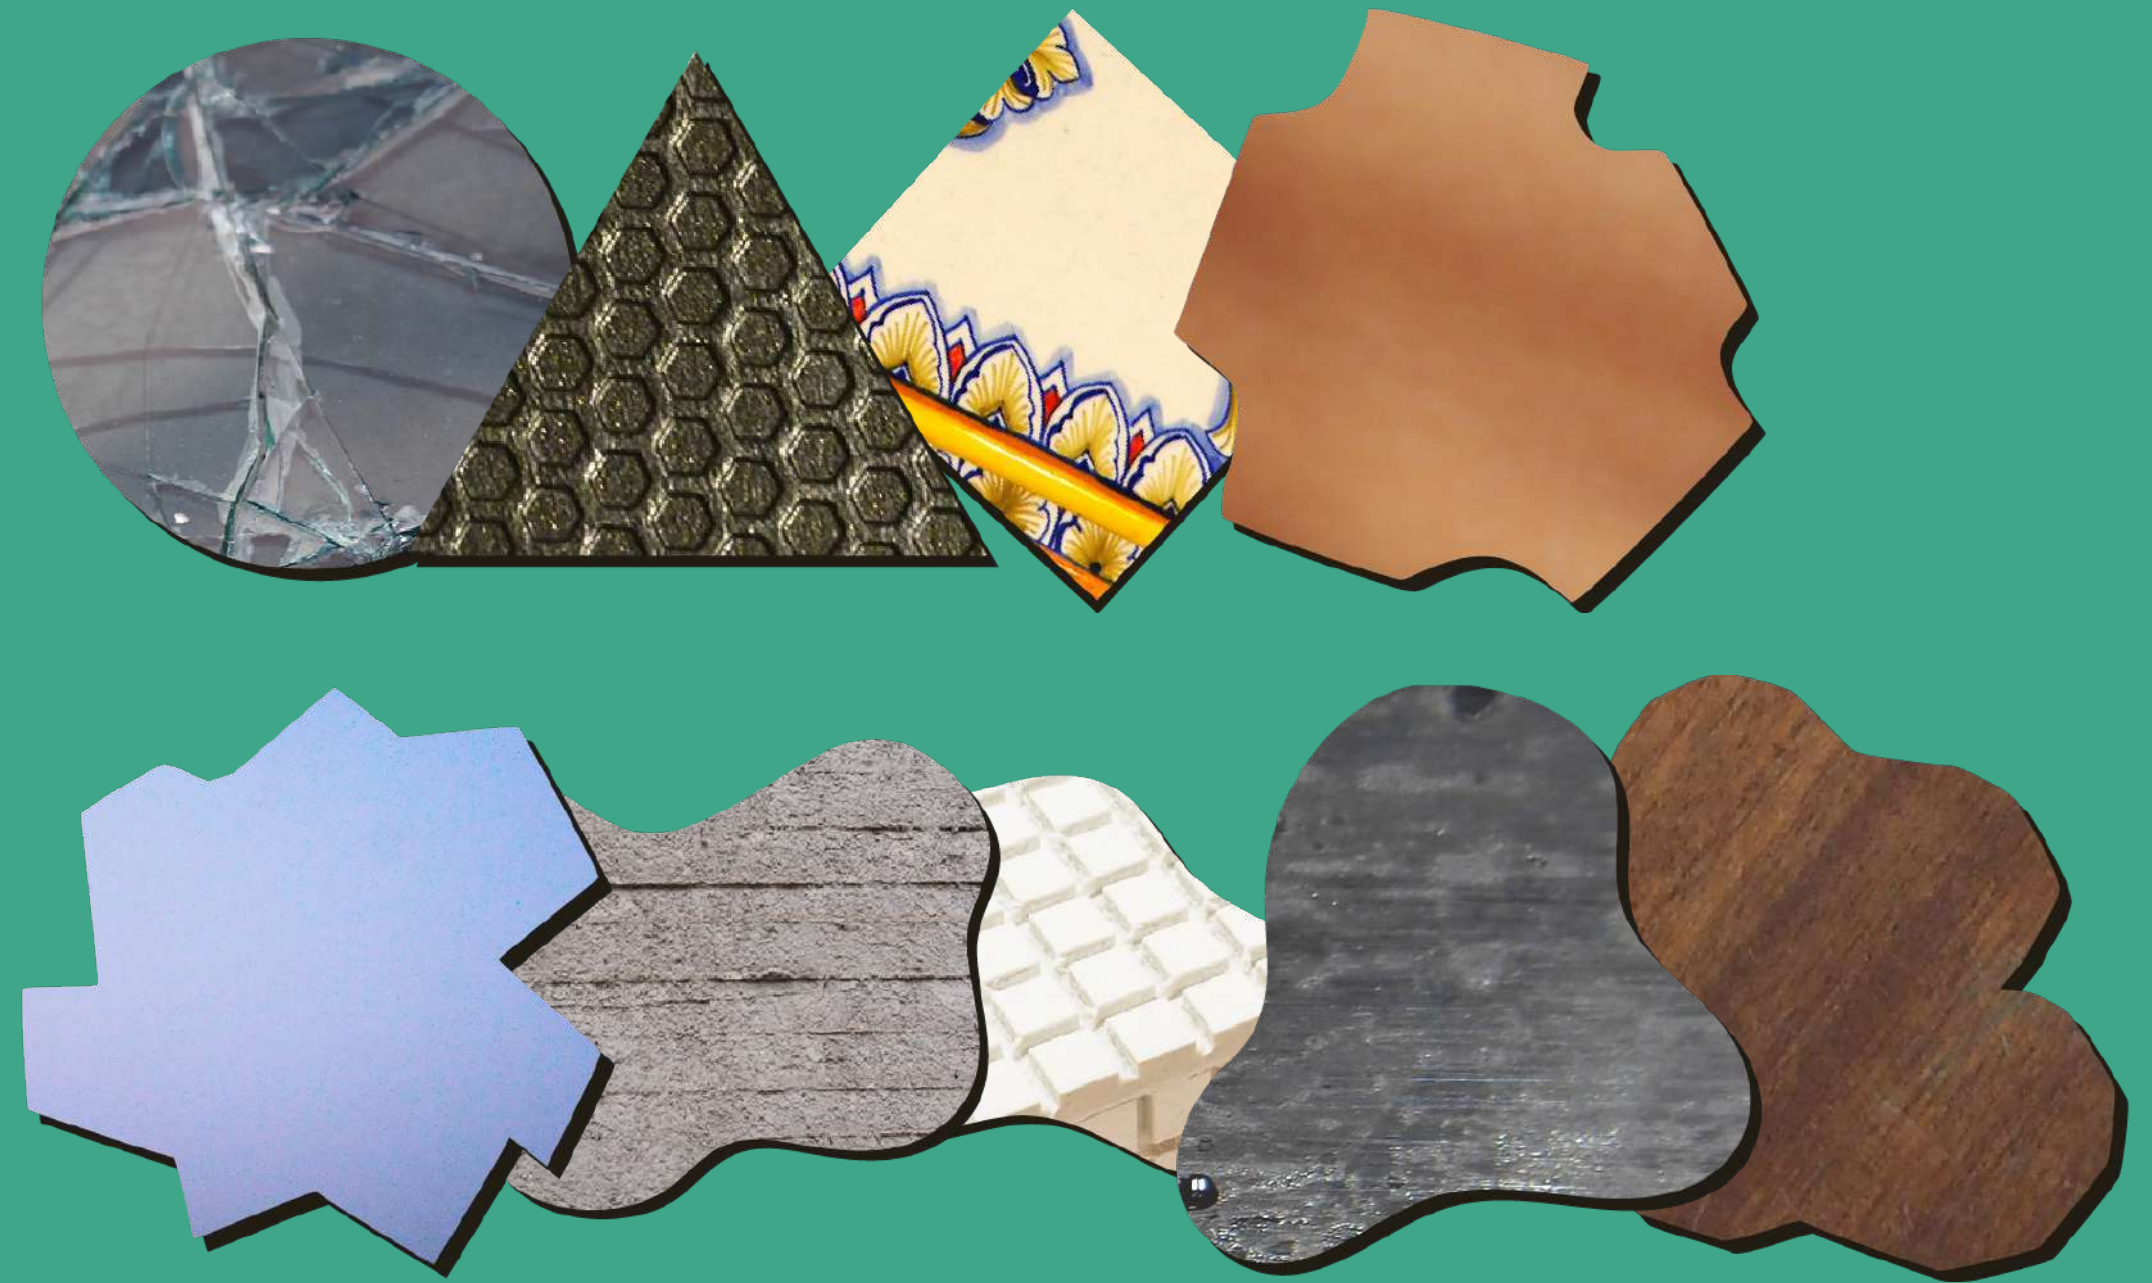

**PESUKARHU**®

SOLUTION

One material  
Any surface

**PESUKARHU**®

## IMPACT OF PESUKARHU SOLUTION

**biodegradable material leaning toward smart circular economy by converting waste to wealth through biocomposites of wasted fibre...,**

**... by turning unwanted fibre strands into a strength material the product becoems and overlay application in everyday fast-moving consumer goods (FCMGs).**

**PESUKARHU<sup>®</sup>**

INVENTED IN TAMPERE  
CRAFTED IN FINLAND
